Digital Imaging Services and Pricing

Improving Your Jury Images

The quality of your submitted images are critical when it comes to applying to art shows or presenting your artwork to prospective clients. I've worked with over 5,000 artists who now have better looking images and an increased chance of success. **See my testimonial page**.

Working With Me

All image improvements completed and uploaded within 24 hours (usually the same day) so you can meet any deadline.

My Services

Besides **photographing artwork for artists**, I have two levels of image improvement. The first and most often requested is the **basic $30 per image package or five images for $140**. Perfect for artists wanting improved images to apply to art shows asking for digital images or using ZAPP or JAS. The second level is my **advanced $95 per image package** which includes changing the background, adding shadowing to make the artwork pop and removing reflections from photographer's lights. **I also improve booth images**.

Besides my imaging services, I do **free image evaluations** and **consulting with artists**. And if you want to do your own image processing but need help formatting the images for ZAPP or JAS, I offer free ZAPP image formatting on my **JuryImages.com** web site, which doesn't improve the images, only converts them to the sRGB color space and formats them properly for ZAPP

Basic Image Improvement Package

$30 per image or five for $140 - Includes color correction and cropping to optimize how the jurors view them. Includes formatting for ZAPP and JAS as well as any other format you may need if requested at the same time, which might include 4x6 prints, 35mm slides or for your web site. It also includes removing signatures from 2D art. Besides working from digital images, I can scan 35mm slides and flat art up to 11x14, color correcting them for the same $30. I also scan and color correct medium or large format transparencies up to 4x5 for $30 each. **So, the price for five images is $140.** It's $20 per additional image.
